

XZONE

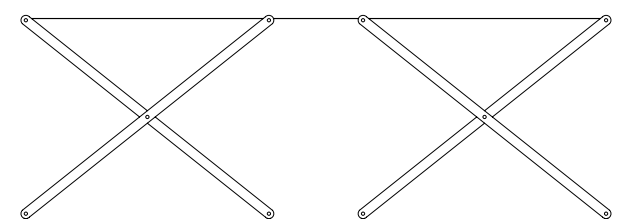

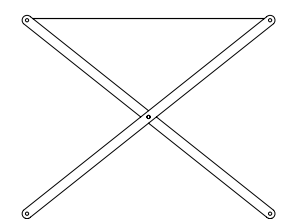

design Ivan Palmini

Versatile, ecocompatibile, modulare. XZone arricchisce di nuovi contenuti l'idea del gazebo domestico, luogo di incontro e di convivialità, e lo declina nei contesti urbani e del business, con funzioni diverse e differenziabili. Fisso o temporaneo, si adatta a tutte le situazioni, definendo uno spazio di relax privato, l'area di uno stand o di un chiosco urbano.

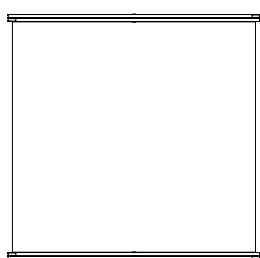

Oggetto di design progettato per vivere ed arredare gli spazi contemporanei, XZone esalta il concetto di versatilità. Oggi semplice struttura singola, per fare ombra a persone ed auto, domani aggregazione multipla, corredata di pedana, arredata o con comodi cuscini posati direttamente sulla pedana. Oppure vetrine espositive e scaffalature, per fiere, manifestazioni cittadine ed open house.

Versatile, eco-compatible, modular. XZone gives new content to the idea of the domestic gazebo, a place to meet and have fun, and uses it in urban and business contexts, with different and varying functions. Fixed or temporary, it can be adapted to any situation, marking a private area for relaxation, the outline of a booth or becoming an urban kiosk. Design object created to furnish and live in modern spaces, XZone enhances the idea of versatility. Today a simple structure, used to shade people or cars, tomorrow a group of multiple units fitted with a platform, furnished or with comfortable cushions resting directly on the platform itself. Or display cabinets and shelving, for trade fairs, city events and open house occasions.
