

LOCO SYSTEM

design Ivan Palmi

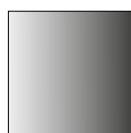

Loco System è pensato per l'arredo urbano e per tutti i luoghi d'attesa, pubblici o privati. Fuori, dentro, ovunque. Con panche singole o composte, basic ed accessoriate, neutre o personalizzate. Ed innumerevoli complementi declinabili a seconda dei luoghi e delle funzioni. Logico e tecnologico, stabile e leggero, uno e tanti, infinitamente componibile e riciclabile. Il sistema prende forma da un concept progettuale unico, espandibile all'infinito: pensiline, tavoli, dissuasori, totem informativi, elementi portabiciclette, postazioni wi-fi completano ed arricchiscono la seduta.

Loco System is designed as street furniture and suitable for all public and private waiting areas. Indoors, outdoors, anywhere. With separate or composite benches. Basic or accessorised, neutral or personalised, with numerous add-ons according to the location and function. Logical and technological, stable and light, one or many, infinitely modular and recyclable. The system takes its form from a design concept that is unique and infinitely expandable: shelters, tables, speed bumps, notice boards, cycle holders, wi-fi stations, all complete and enrich the seating arrangement.
